Among the hidden

Margaret Peterson Haddix

Science Fiction

This book is for people that like Science Fiction. Among the hidden takes place in a house. The main

character is Luke. Luke has to stay in the house because of this law that says you can't have more than 2 children. Luke wants to go out and play like a normal child would. Luke wishes this

rule did not exist. Luke is the third child and he can't do what a 2 or 1 child could do. There is this thing that the third children go to so this law is not a law. Do they change the law?
