City Of Ember

Jeanne DuPrau

Science Fiction

I recommend this book to people who like to read adventure and action. Found in the library.

The *City of Ember* is about girl who does not want to stay in her city. She doesn't want to stay their because it is always dirty and can't stand it. But then she gets a job from the mayor. She gets the job she wanted for so many years. But then the police came after Lina (the girl who has the job) and Doon (another big character) who are running away. Will they find another place to live or will they not and have another year in their terrible place? Read the book to find out.
