I recommend this book to a person who likes realistic fiction. I also recommend this book to a person who likes being in realistic settings like, a shop or a school.

In this book a girl named Willow Chance has terrible news, for example, her parents died in a carcrash. In this story Willow has a hard time coping with that her parents are dead. She runs away when she is at the hospital after getting cut. You could find this in the kdl library. Will Willow ever be happy?
