

## Brendan Clarke Recommends...

Eye of Minds

James Dashner

Science Fiction

I recommend this book to someone who likes futuristic books and a lot of high tech computers and video games. I also recommend it to someone who likes hackers and a lot of action. This can be found in the library and at Barnes and Noble.

*The Eye Of Minds* takes place in the future and the video games are very high tech, you actually go in the game. In this book there are three best friends that are hackers, named Bryson, Michael, and Sarah. They are chosen for a special mission, to stop the evil hacker Kaine, who is trapping people in the game with his robots. They have to get through the obstacles he has for them and stop him. Read the book to find out if they can.
