Godzilla

Greg Cox

Science Fiction

I recommend this book to any fan of science fiction books, fans of Godzilla or giant monsters, and people who liked the *Godzilla* (2014) film. Found this book in my house (I own the book).

In this book, The Janjira power plant, the place where Joe Brody works, is destroyed when a M.U.T.O. cocoons there. Fifteen years later, Ford Brody, a soldier in the US military, has to leave his family go to Japan because Joe, his Dad, is arrested. Ford then joins his Dad to figure out what destroyed the power plant 15 years ago. The M.U.T.O. than hatches, which causes Godzilla to awaken from his 60 year sleep. Will Godzilla stop the deadly M.U.T.O.'s and will Ford reunite with his family, or will he die. Read *Godzilla* to find out.
