Harry Potter Series

JK Rowling

Fantasy

I recommend this series to a person who likes action packed stories filled with silly, but serious, things happening all over the place. Found in the library.

In this series, a young boy named Harry Potter is currently living under a staircase in a cupboard when his whole world turns upside down. He got a letter in the mail and right when he was about to open it, his cousin Dudley pointed it out, and Aunt Petunia and Uncle Vernon stole it from him. He soon figures out he is a wizard, and he will go to Hogwarts, the best wizard school known to man. Things are looking too magical to be real for Harry, but that quickly changes. Read about Harry and his friends fight creatures, wizards, and find out who He-Who-Shall-Not-Be-Named is. Seven books of adventure, are you

ready.
