## The Dead

Charlie Higson

### Fantasy

I recommend this book to a person who likes a lot of action and thriller scenes in their books. This would also be a good book for people who like zombies and non-human creatures. You can find this book at many different book stores.

*The Dead* is about a disease that turned about 99 percent of all of the grown ups in the world into zombies.

The only grown-ups that aren't zombies live underground in subway stations. Only the kids that are 18 and younger are still human. Ed and his friends try to survive through all of this without being eaten by the zombies. On their journey through London they lose a lot of their friends including Ed's best friend.
