Wings Of Fire Series

TUI T. Sutherland

Fiction/Fantasy

I recommend this book to people who like adventurous books that are hard to put down. I recommend reading the series in order because otherwise it can get confusing. You can find this book at the library, they have books one, two, three, four, and six. I don't think they have any of the other books, there are seven in the series. You can also find them at the Caledonia Public Library I think. The main idea of the book is that there are dragonets of a prophecy, and they have come to stop the great war.

(The great war started because a scavenger, or person, killed the queen of the Sandwings and her three daughters are fighting for the throne, and the allied with the other tribes to have help.)

Overall, this series would be great to anyone who likes a bit of mystery, adventure, and war in their book. What queen will they pick? Will they save the dragon kingdoms? Find out by reading the Wings Of Fire series.
